30ML

ENDPOINT — TREAT TO ENDPOINT, NOT TO THE CLOCK

Uniform pink erythema → light frost. Then neutralize.

5 MIN
MAX CONTACT

TIME	PROCEDURE
2 MIN	Prep Cleanse + degrease (PREP.01), air-dry. First session: patch test post-auricular, observe 10 min.
1 MIN	Apply Thin, even layer by fan brush. Avoid eyes, lips, nostrils. No layering.
3-5 MIN	Titrate Observe continuously to endpoint. Start low on first sessions; extend only with proven tolerance. Never exceed 5 minutes.
2 MIN	Neutralize NEUT.01 — every session, every zone. Cold water as secondary. Never let it self-neutralize.
—	Finish Balm (REST.01) + SPF 50+ before the patient leaves. Hand over the aftercare card.

STOP — NEUTRALIZE

Abort on **any** of these, at any minute. NEUT.01 first, cold water second.

Escalating burning or pain

Deep-red erythema
beyond the expected uniform pink

Edema in the treated field

Urticaria or wheals

Patient cannot tolerate it

PROGRAM

4-6 sessions per course

30 days between sessions

Allow 25-45 days between any peels, by strength and potency. Prime higher phototypes: 2 weeks topical retinoid.

DO NOT TREAT IF Re-verify every visit, not only the first.

- ✗ Active dermatitis, eczema or infection

✗ Topical retinoid within 72 hours

✗ Allergy to any listed active

✗ Sunburned / recent sun exposure
- ✗ Pregnancy or breastfeeding

✗ Broken skin / compromised barrier

✗ Laser / IPL within 2 weeks
- ✗ Oral isotretinoin within 6 months

✗ Keloid or hypertrophic scar history

✗ Active herpes simplex
